

# TEXT ANALYZER

[Help/ Quick Start Guide](#)

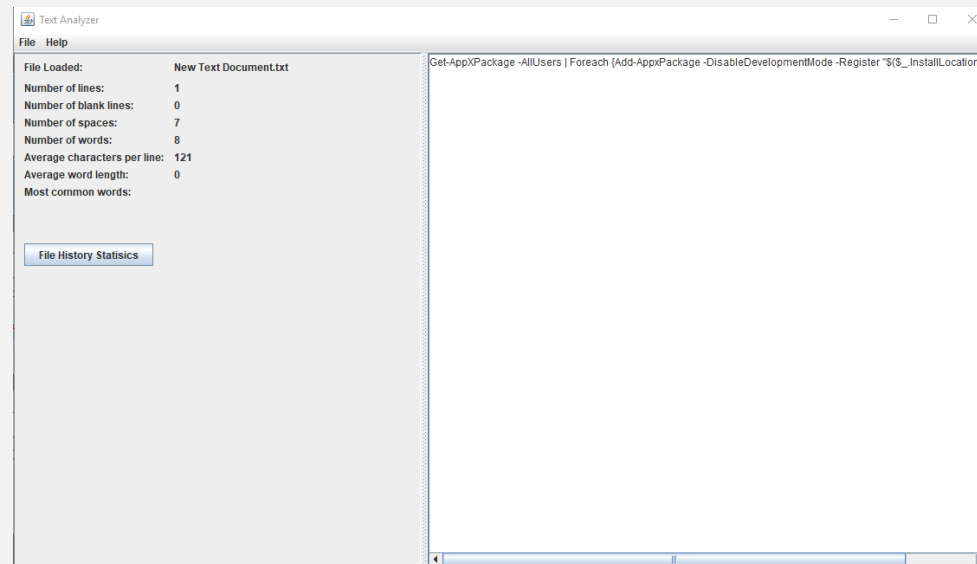

# GETTING STARTED

- When you open up the application you can load a text file by:  
File > Load > Select a file...
- Click open to load selected file.

# GETTING STARTED

- When a file is loaded, you can see the contents and various statistics.
- A new file can be reloaded simply by loading another file from the File menu.

# FILE HISTORY

- All file statistics can be viewed clicking File History Statistics from the main window.
- Here you can view total file statistics and load old files.

File History Statistics

A screenshot of a software window titled 'File History'. The window has a red title bar with standard Windows window controls. It is divided into two main sections. The left section contains a list of statistics: 'Average number of lines:', 'Average number of blank lines:', 'Average number of spaces:', 'Average characters per line:', 'Average word length:', and 'Most common words:'. Below these statistics is a 'Load File' button. The right section contains a table with two columns: 'File Name' and 'Date Loaded'. The table has two data rows: 'My Sibling Addresses.txt' with date '2017/11/12 19:00:53' and 'New Text Document.txt' with date '2017/11/12 18:57:53'.

File Name	Date Loaded
My Sibling Addresses.txt	2017/11/12 19:00:53
New Text Document.txt	2017/11/12 18:57:53

# LOADING OLD FILES

- In the File Statistics menu, simply select an old file from the list to make it highlighted, and click on load file to load old file into the main window.
